Today, bicycles are so common that it's hard to believe they haven't always been.... (86) But two hundred years ago, bicycles didn't even exist, and the first bicycle, (87) in Germany in 1818, was nothing like our bicycles today. It was made of wood and didn't even have pedals. (88)...., however, numerous innovations and improvements in (89) have made the bicycle one of the most popular means of recreation and transportation around the world.

In 1839, Kirkpatrick Macmillan a Scottish blacksmith, dramatically.... (90) upon the original bicycle design. Macmillan's machine had tires with iron rims to keep them from getting worn down. He also used foot-operated cranks similar to pedals, so his bicycle (91) at a quick pace. It didn't look much like a modern bicycle, though, because its back wheel was (92) larger than its front wheel. In 1861, the French Michaux brothers (93) the evolution of the bicycle a step further by inventing an improved crank mechanism. Ten years later, James Starley, an English inventor, revolutionized bicycle design. He made the front wheel many times larger than the back wheel, (94) a gear on the pedals to make the bicycle more efficient, and lightened the wheels by using wire spokes. (95) this bicycle was much lighter and.... (96) to ride, it was still clumsy, extremely top heavy, and ridden mostly for entertainment.
